

HAWKEYE HOME INSPECTION

1. Radon is a radioactive gas emitted from the earth from the breakdown of uranium in the soil.
2. Iowa has the highest average level of radon gas in our homes than any other state in the nation.
3. High levels of radon gas in your home can lead to lung cancer.
4. The average radon level in Iowa homes is more than twice the acceptable risk level set by the EPA.

Testing for radon gas is easy and inexpensive, and may save your life.

Call us to schedule a test for your home today.
